

Bereket Getaw

AI / Machine Learning Engineer

Addis Ababa, Ethiopia github.com/Bereket613

PROFESSIONAL SUMMARY

AI/ML engineer building practical systems across machine learning, deep learning, NLP, computer vision, and big data — including privacy-preserving ML, RAG systems, and agentic AI. Experience spans applied projects from data processing and model training through to deployed applications, with a recurring focus on Ethiopian language technology such as Amharic NLP.

TECHNICAL SKILLS

Machine Learning

Supervised & Unsupervised Learning, Classification, Regression, Anomaly Detection, Model Evaluation

Deep Learning

Neural Networks, PyTorch, TensorFlow, Computer Vision, Representation Learning

NLP

Transformers, Large Language Models, RAG, Multilingual NLP, Amharic NLP

Computer Vision

Image Classification, Object Detection, Pose Estimation, Image Processing

Big Data

Apache Spark, PySpark, Data Processing, Streaming / Data Pipelines

Programming & Tools

Python, R, SQL, PySpark, Git, GitHub

EXPERIENCE

Information Network Security Agency (INSA)

2026

3-Month Internship

- Worked on AI and machine learning, with a focus on privacy-preserving machine learning and related research and engineering work.

DataParse Club — Debre Berhan University

Co-Founder

- Co-founded a data and AI community at the university; built a space for students to learn and collaborate on data projects.

INSA 5th Round Summer Camp

Member

- Participated in the INSA 5th Round Summer Camp as part of technical development.

SELECTED PROJECTS

Coffee RAG Chatbot & FITAI Multilingual RAG Chatbot

NLP · RAG · LLM

Retrieval-augmented chatbots answering questions from knowledge bases, including a multilingual assistant.

Amharic Sign Language Detection

Computer Vision · Deep Learning

Recognizes Amharic sign language gestures from video/images.

Encrypted Amharic Sentiment Analysis

NLP · Privacy-preserving ML

Sentiment analysis for Amharic text on encrypted data.

Coffee Leaf Detection & Road Crack Detection

Computer Vision · Detection

Image-based detection systems for crop health monitoring and road surface inspection.

Credit Card Fraud Detection & KYC Risk Classification

Machine Learning · Classification

Supervised classification models for financial risk and fraud cases.

Amharic Fake News Detection

NLP · Classification

Detects fake news articles written in Amharic.

AI Data Analyser

Machine Learning · Data Analysis

Platform for exploring datasets and generating insights with machine learning.

EDUCATION

BSc — Data Science

Debre Berhan University, Ethiopia
